

INTERNET ACCESS

HIGH-SPEED WIRELESS INTERNET

THE NEXT GENERATION OF HIGH-SPEED ACCESS – AVAILABLE NOW

Broadband wireless access is a next-generation technology that is quick to install, cost-effective, fast, and reliable. The AirLink high-speed data network employs the most advanced, broadband wireless technology available today. Operating in both the 2.4GHz and 5GHz frequency

ranges, the AirLink network currently covers over 900 square miles in and around Sapulpa, Kellyville, Sand Springs, Beggs, Kiefer and Mounds. Take advantage of new services such as **Voice over IP** (VoIP) from Vonage or magicJack or use Skype to stay connected with friends and family. The next generation of high-speed internet is available NOW!

EASY INSTALLATION

A PHONE CALL. . . . A SITE SURVEY. . . . INSTALL INSTALLATION NORMALLY TAKES LESS THAN 2 HOURS

To connect you to the internet, we install a small antenna on the roof or side of your home or office. The antenna is pointed at one of our local towers, establishing your wireless internet connection. Your connection is always on and you never have to disconnect because you or your kids need to use the phone. Your internet connection can be shared among multiple

computers in your home or office by using a wireless router. Depending on your location and surroundings, professional installation can be as little as **\$149.00** complete. In some situations, additional mounting hardware might be required at an additional cost. A **FREE** site survey will determine the exact cost of your installation.

BASIC INTERNET

UP TO 1.5Mbps UP AND DOWN OK FOR SD STREAMING VIDEO

Our basic high-speed internet service offers speeds that are up to 25x faster than dial-up and is perfect for staying connected with friends and family. This package offers speeds of up to 1.5Mbps for upload and download and can be

used for standard definition streaming video such as Netflix, Hulu and YouTube. This is our most popular and economical internet package. **\$39.95 per month**

ADVANCED DATA PACKAGE

UP TO 3.0Mbps UP AND DOWN OPTIMIZED FOR “WORK FROM HOME”

The AirLink Advanced Data Package offers speeds of up to 3.0Mbps up and down which is double the speed of our Basic Internet. This package is optimized

for “Work from Home” and IT professionals and is excellently suited for VPN connections and video conferencing such as Skype. **\$59.95 per month**

HD STREAMING PACKAGE

UP TO 5.0Mbps DOWN and 1Mbps UP

Enjoy High Definition (HD 720) streaming media with our fastest available package. This package works well with your Apple TV box,

Google TV box, Roku box, Xbox Live, PlayStation, Blu-Ray player and other streaming media devices. **\$99.95 per month**

NO CONTRACTS OR DATA CAPS

THE PERFECT INTERNET SOLUTION

With AirLink there are no contracts or commitments - you can cancel anytime. We bill on the first day of the month for that month of service and continue on a month-to-month basis. While we do expect our customers to be reasonable with usage on the AirLink network, there are no data caps or restrictions.

WE ARE A LOCAL BUSINESS

FOUNDED IN MAY OF 2010 AND LOCATED IN MOUNDS, OK

With strong ties to the local community, we at AirLink believe we are providing a valuable service for the community by offering fast, affordable and reliable high-speed internet. We are excited and proud to see local businesses and communities utilize our high-speed

network to grow both personally and professionally. By selecting AirLink as your internet provider, you are not only supporting a growing local business, you are also supporting the community you live in through state and local taxes.

OURNETWORK

FIBER OPTIC BACKBONE

SPEED AND BANDWIDTH NOW. . . . AND FOR THE FUTURE

AirLink owns and operates the largest dedicated internet network in our service area. We utilize a dedicated fiber optic connection for our backbone which can provide

over 10Gbps of bandwidth with latencies less than 30ms. Our network is 100% routed which guarantees traffic follows the shortest path to its destination.

POINT TO POINT WIRELESS

NO SATELLITES – WE BEAM THE INTERNET DIRECTLY TO YOU FROM OUR TRANSMISSION TOWERS

We do not use any type of satellite system. Satellite systems are slow and can be affected by weather. Our transmission towers utilize high-speed and high-frequency microwave communications that

form an advanced point-to-point wireless network. Our network is immune to adverse weather such as rain or snow and typically exceeds a 99.9% uptime.

CUSTOMER SERVICE

CUSTOMER SUPPORT

WE PRIDE OURSELVES IN EXCELLENT CUSTOMER SERVICE

Working closely with the communities we serve, our focus is on your needs so we are able to provide you with a solution rather than just a service. Tell us about your Internet needs and we will tailor a solution that fits you. While

many other companies are outsourcing their support out of Oklahoma or even out of the country, our support team is here locally to help you in any way we can.

SUBSCRIBER BENEFITS

PRODUCT UPDATES AND TECHNOLOGY BREAKTHROUGHS

Today, there is no need for a phone company. You can use the AirLink network to make phone calls by using services such as Vonage or

magicJack. These services digitize your voice and send them over the internet where they are reassembled on the other side.
